Sparta, North Carolina 28675

Re: Request for Information on old unlined landfills, Alleghany County.

Dear Mr. Adams,

The Division of Waste Management, Superfund Section, Inactive Hazardous Sites Branch (Branch) is in the process of cataloging old landfills in the state. This letter is being sent to you to solicit your cooperation in providing information on old unlined landfills that are not subject to Division of Waste Management, Solid Waste Section post-closure regulations in your county. This process is a part of a statewide effort to accurately inventory old dumpsites to aid in safe reuse and to protect public health and the environment.

Once an old landfill site has been identified, the site location, site usage, and vicinity usage is researched. Potential hazards to the public and the environment are then evaluated by risk assessment. Sites then are reviewed based on risk and/or by safe redevelopment requests.

The Branch then works with owners and responsible parties on final solutions for containment of the waste and to ensure safe reuse of the old landfill sites. Safe reuse might involve engineering controls to prevent exposure to wastes, if necessary, and restrictive covenants limiting the property to certain uses and setting conditions for construction or other soil disturbing activities. Annual reporting that restrictive covenants remain in place will be a duty of the current owner.

Known old landfills/dump sites are maintained in a database. Attached is a listing of known sites located in your county. Available information that may include location and years of operation information for each site is also listed. Please review the list and verify or provide information that will more accurately characterize the site(s). If you have knowledge of sites not included on the list, please add the additional sites along with location information, directions, years of operation, and any additional notable information.

Please return the list and any additional information within 90 days to:

Cheryl Marks  
Inactive Hazardous Sites Branch  
Superfund Section  
NC Division of Waste Management  
401 Oberlin Road - Suite 150  
Raleigh, NC 27605-1350

Or you may email me with your response at [Cheryl.Marks@ncmail.net](mailto:Cheryl.Marks@ncmail.net) or call with any questions concerning this request at (919) 733-2801, extension 283. Thank you for your cooperation.

Sincerely,

A handwritten signature in cursive script that reads "Cheryl Marks".

<SAL> <FIRST> <LAST>, County Manager  
County of <MUNICIPALITY>  
<ADDRESS>  
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

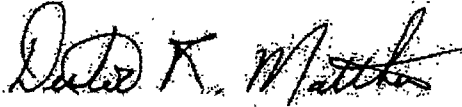

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at [jack.butler@ncmail.net](mailto:jack.butler@ncmail.net) or call (919)508-8450.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dexter R. Matthews". The signature is fluid and cursive, with the first name "Dexter" and last name "Matthews" clearly distinguishable.

July 25, 1975

Mr. Lee Tompkins, Chairman  
~~Allegheny County Board of Commissioners~~  
Sparta, North Carolina 28675 J & R

Dear Mr. Tompkins:

I have been informed that you and your board are evaluating landfill equipment to purchase for the County landfill.

While it is not the policy of this office to try in any way to dictate to County Commissioners the type of equipment to buy, I would like to give you the advantage of our experience with equipment throughout the State on some 109 disposal sites. We have found that the size and type of equipment needed varies according to volume of waste received, type of waste and the site make-up. On medium and large sites where more than one piece of equipment is needed, specialized equipment such as compactors, elevated scrapers, drag-lines, etc., are to be considered. While on the small volume landfill as you have in Allegheny County, we have found the track loader to be a much more versatile piece of equipment. A compactor does an excellent job of spreading and compacting waste but for earth moving, it is very questionable on the site we have observed.

If there are questions or if we can be of any service, please let us know.

Sincerely,

O. W. Strickland, Supervisor

RE: July 1, 1975 Meeting Between the  
Town Council of Sparta and the  
Alleghany County Commissioners  
Pertaining to Changing Alleghany  
County's Solid Waste Program

Dear Mr. Strickland:

I am writing you at the suggestion of Mr. Fulp and also because I feel obligated as a concerned sanitarian to do so.

It was decided at the meeting mentioned above that the original solid waste program and grant for Alleghany County would be changed drastically from its original format. First of all I would like to go on record here and say that I objected to any proposed changes in this program as I stated last night at this meeting; Mr. Carl Tuttle can verify this.

The following changes in the program were suggested by certain members of the Town Council of Sparta, the Alleghany County Commissioners, and Mr. Carl Tuttle, Council of Governments. They are:

1. That the seven 40 cubic yard containers be deleted from the program.
2. That the one (1) all hydraulic lifting unit mounted on a standard cab-over truck chassis be also deleted from the program.
3. That one (1) compactor \$50,000 to \$80,000 be bought in lieu of the 7-G Caterpillar mentioned in the program.
4. That the garbage and refuse service out in the county continued to be provided by a private hauler franchised by the county. That he would provide all necessary containers, and that garbage would be picked up by him for a monthly fee.
5. Money left over from the grant would be used to build a building

Mr. O. W. Strickland, July 2, 1975 - Page Two

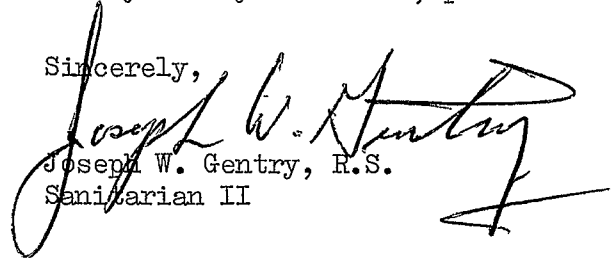

to store equipment at the landfill. That a privy would be built at the site and that a phone also would be provided at the site. I agree with this provision.

6. The suggestion I made about using some of the money to close existing open dumps was left up in the air.

So, as you can see the gist of this meeting did not agree with our program, but instead favored special interest groups.

I hope that this letter will be held in the strictest confidence. Thankyou, and if I can ever be of service to you or your office, please do call on me.

Sincerely,

  
Joseph W. Gentry, R.S.  
Sanitarian II

NC 28675

Dear Mr. Tompkins:

SUBJECT: Changes and improvements in the proposed management program for Solid Waste Disposal in Alleghany County.

The following changes in Alleghany County's Solid Waste Program was presented to me by Mr. Jim Fulp on January 23, 1975. These changes in our program should accomplish the following objectives.

- A. Some money.
- B. Eliminate waste and unsightly conditions.
- C. Conserve space in landfill.

This letter and its enclosures will facilitate and explain the proposals made by Mr. Fulp. They are:

### A. EQUIPMENT

Section V - Cost Analysis, capital investments (landfill), first paragraph under equipment. One (1) high-lift loader with multi-purpose bucket to be used as a back up piece of equipment. It is felt by Mr. Fulp that a small compactor with spiked wheels would be better for our purpose because the spikes will push all garbage and refuse into the dike area of the landfill. All non-combustibles such as discarded stoves, washing machines, refrigerators, bedsprings, etc., could be crushed and flattened at the toe of the dike and pushed up on the dike of the landfill and covered. In this manner, all refuse and garbage can be put into the landfill, and a special ditch at the top of the landfill would not be required. It was also pointed out by Mr. Fulp that the high-lift or front loader could be used to furnish a sufficient amount of dirt for the compactor. It is felt that with a compactor we can get better use out of our landfill, that the landfill will last a lot longer, and that all garbage and refuse can be handled more efficiently.

### B. CONTAINERS

The 40 cubic yard roll-on containers (20' x 8' x 8') is still the most feasible type of container for Alleghany County. It would require only 6 containers suitably located to take care of all refuse and garbage throughout the county. Using this type container cuts down on expense and eliminates

Page 2  
January 29, 1975  
Mr. Leo Tompkins

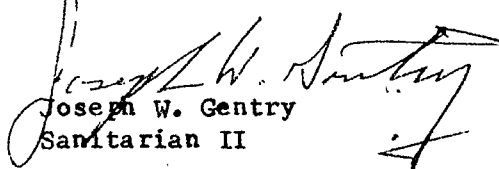

unsightly conditions caused by small containers, and also, no special truck is needed for these containers. With these large containers the only equipment needed is a large truck, and a tilted low-boy with strong winch attached (is needed in order to pull these containers on to the low-boy.) As you can see, this type of operation could involve a considerable savings in money, time, and equipment for this county.

C. CONTAINER SITE SAFETY

Note last page - Annex A. It is felt that the container should extend about 12" above the top of the ramp, and that an overhanging piece of metal be put here in order to prevent vehicles (discharging their garbage) from backing off into the containers. This would also prevent people from slipping or falling into the opening between the containers, and the top of the ramp leading up to the containers.

Thank you, and if there are any questions as to this report, please call my office at any time (372-5641).

Sincerely,

Gentlemen:

Beginning on January 16, 1978 I will be employed by the Brunswick County Health Department as a Supervising Sanitarian. As soon as possible after I begin working I would like to coordinate inspections of the landfill, and area dumpsters with your department. I would also like to have a copy of your inspection report for my files. I think it is very necessary that local and state health departments work together in each county. I have had a very good working relationship with your man in Alleghany County Mr. Bill Myers. He is a good man to work with, and it has been a pleasure knowing him.

If you could have your man contact me prior to his visit to Brunswick County it would be appreciated. Thank you very much.

Sincerely yours,

*Joseph W. Gentry, R.S.*

REGIONAL OFFICE

PUBLIC HEALTH SERVICE

Room 866

December 27, 1973

Honorable Wilmer D. Mizell  
House of Representatives  
Washington, D. C. 20515

Dear Mr. Mizell:

Your letter dated December 5, 1973 to Mr. Charles Alicks, Congressional liaison, DHEW, Washington, D. C., regarding an application for the Alleghany, North Carolina Solid Waste Program has been referred to our office for response.

Through Appalachia Regional Commission support of Grant #0451-023-73, in June 1973, DHEW provided funds to Alleghany County for initiation of a sanitary landfill. This support was obtained sometime after the other counties in the region (Ashe, Avery, Mitchell, Watauga, Wilkes, and Yancey) had acquired ARC support for several reasons:

1. Alleghany County did not wish to join with Ashe County and operate a joint landfill near the county line because of the rugged mountainous terrain and bad road conditions, especially during the winter months when ice and snow are common;
2. they were not certain whether such an operation would be financially feasible due to the distance involved to reach the landfill;
3. the relationship between the Town of Sparta and Alleghany County was not clear in relation to local expenses involving the establishment and operation of the solid waste project.

Honorable Wilmer D. Mizell

December 27, 1973

Page 2

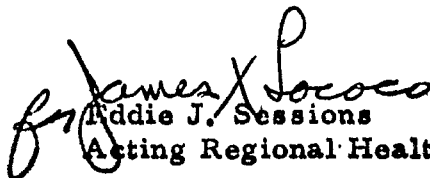

Our office and Environmental Protection Agency staff participated in a site visit to Alleghany County in July 1972. At that time, it was recommended that the population base of Alleghany County (around 8,000) made it economically unfeasible to attempt to support a collection system entirely from county funds. DHEW and EPA representatives suggested that it would be more feasible for the county to establish a mailbox collection system on a fee-for-service basis. However, in February 1973, when Alleghany County applied for ARC support of a sanitary landfill operation, the grant proposal stated that "once the landfill is in operation, it is the intent of the Alleghany County Commissioners to franchise the entire collection system for the county to a private collector who has been operating a successful collection system for the past nine months in most areas of the county. The Town of Sparta has operated its own system for a number of years". Based on the proposal, ARC support to establish a sanitary landfill was approved on June 13, 1973.

The Appalachian Health Program, PHS, is responsible for providing recommendations of projects to the Appalachian Regional Commission for Section 202 funds. However, to the present, we have not received the North Carolina project package which identifies projects for FY 74 funding, nor have we received a copy of a grant proposal requesting ARC funds for Alleghany County for FY 74 funds.

We expect to receive shortly the North Carolina project package and we will provide a recommendation to the Appalachia Regional Commission on the conceptual acceptability and technical merits of the projects contained therein, prior to the submission of individual proposals.

Since the identification and selection of projects for ARC support is determined at the State level, additional information may be obtained by contacting Mr. William L. Bondurant, Secretary, Department of Administration, 116 West Jones Street, Raleigh, North Carolina 27602.

Sincerely,

  
Eddie J. Sessions

Acting Regional Health Administrator

January 7, 1974

MEMORANDUM

TO: Mr. B. Gene Barrett  
Planning Office

FROM: Sidney H. Usry, Head  
Solid Waste & Vector Control Branch  
Sanitary Engineering Section

SUBJECT: Alleghany County Solid Waste Program  
*SHU*

The proposed solid waste program for Alleghany County has been reviewed by this office and we would encourage the approval of this application for a grant from the Appalachian Regional Development Act.

This program is very badly needed in Alleghany County in order that they might meet the requirements of the "Rules and Regulations Providing Standards for Solid Waste Disposal" that are now enforced in this State. It is our opinion that this present plan will provide an effective and meaningful program for the people of Alleghany County.

SHU:bm

## ASSURANCES AND CERTIFICATIONS BY APPLICANT

The following assurances and certifications are part of the project grant application and must be signed by an official duly authorized to commit and assure that the applicant will comply with the provisions of the applicable laws, regulations, and policies relating to the project.

The applicant assures and certifies that he has read and will comply with the following:

Title VI—Civil Rights Act of 1964 (PL 88-352) and Part 80 of Title 45, Code of Federal Regulations, so that no person will be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination on the grounds of race, color, or national origin.

Patents and inventions (Current PHS Policy Statement) under which all inventions made in the course of or under any grant shall be promptly and fully reported to HEW.

Specific assurances, policies, guidelines, regulations and requirements in effect at the time the grant award is made and applicable to this project (including the making of reports as required and the maintenance of necessary records and accounts, which will be made available to the Department of HEW for audit purposes) which are contained and listed in the grant application package and made a part hereof.

## SHORT SUMMARY OF PROJECT

PROJECT IDENTIFICATION NO.

## TITLE OF PROJECT

Alleghany County Solid Waste Project

## SUMMARY STATEMENT (Not to exceed 200 words)

This project is submitted as a request for a grant to complete the Solid Waste Program in Area "D".

This proposal for Alleghany County will only then complete the Solid Waste Program for Area "D".

The request is made for one (1) truck, one (1) front-end loader, and seven (7) containers to be used in the container and compaction system.

Alleghany County and the Town of Sparta have had no help with solid waste disposal and are saddled with the huge burden.

The County of Alleghany and the Town of Sparta will finance the Program on a 50-50 basis the first year of operation. The County then will carry the Program for at least five years, as per letter of endorsement.

## NAME OF PROJECT DIRECTOR

Andrew Yasinsac

## NAME AND ADDRESS OF APPLICANT

Leo Tompkins  
Chairman, Alleghany County Commissioners  
Courthouse  
Sparta, North Carolina 28675

NARRATIVE TO THE REQUEST FOR A GRANT  
FOR THE SOLID WASTE PROJECT  
IN ALLEGHANY COUNTY (REGION "D")

Progress is being made toward achieving the original project objectives of the Solid Waste Program in Region D. A weak point in the program, however, has been a deterrent in fully reaching the anticipated goal; this being the non-participation of Alleghany County in the sold waste program.

With the inclusion of Alleghany County into the sold waste project, the entire area of Region D counties will be active in the program. In the initial funding Alleghany County did not participate for several reasons: 1) The county did not wish to join with Ashe County and operate a joint landfill near the county line because of the rugged mountainous terrain and bad road conditions, especially during the winter months when ice and snow are common. 2) They were not certain whether such an operation would be financially and practically feasible due to the distance involved to reach the landfill, at least two hours round-trip time to landfill. 3) The relationship between the Town of Sparta and Alleghany County was not clear in relation to local expenses involving the establishment and operation of the sold waste project and this has since been decided upon.

It has since been established that a landfill will not have to be operated in conjunction with another county, and Alleghany County and the Town of Sparta are in agreement on their needs and responsibilities of the landfill. Therefore, they are now requesting a grant to assist in the expenses of equipment, personnel, and other cost necessary to operate a

solid waste project, county-wide, (See Letters of Endorsement in Appendix III). Alleghany County currently has a ten year lease on a site for a landfill that will meet the North Carolina State Board of Health's requirements for a sanitary landfill operation. Once the landfill is in operation it is the intent of the Alleghany County Commissioners to franchise the entire collection system for the county to a private collector who has been operating a successful collection system for the past nine months in most areas of the county. The Town of Sparta has operated its own system for a number of years.

In the opinion of the Blue Ridge Health Council and the Regional Health Council of Eastern Appalachia that this request is essential to the total success of the Solid Waste Program in Region D.

\*NOTE: See Addendum (Next Page)

## ADDENDUM

The strict North Carolina Laws in regard to Solid Waste Disposal were not in existence at the time the old Alleghany County Commissioners were first approached on the Region D Solid Waste Proposal so they could not be aware of the grave implications and predicament this would leave this mountain county in by not participating in the original grant. The present Board of County Commissioners is aware of the laws and wish to comply and therefore request assistance. The Commissioners have gone on record as to their ability to maintain the Solid Waste Program after the one year funding is granted. (See Endorsement Letter in Appendix)

OFFICE OF  
THE BOARD OF COUNTY COMMISSIONERS

ALLEGHANY COUNTY  
SPARTA, N. C. 28675

November 14, 1973

ERNEST EDWARDS  
REGISTER OF DEEDS  
EDMUND I. ADAMS  
COUNTY ATTORNEY

Mr. Charles M. Moeller, Executive Director  
Regional Health Council of Eastern Appalachia  
201 South Green Street  
Morganton, North Carolina 28655

RE: Request for Grant for Solid  
Waste Program for Alleghany  
County

Dear Mr. Moeller:

The Alleghany County Board of County Commissioners endorses the above request. We also pledge to support the request in behalf of Alleghany County to operate a sanitary landfill and county-wide solid waste system for a minimum of five (5) years after expiration of federal grant funding.

Initial funding is being done on a 50-50 basis with the Town of Sparta, for the federal grant funding period.

Following the initial federal grant period, Alleghany County pledges to support the solid waste program as a county program through normal budgeting and tax procedures.

Respectfully,

Leo Tompkins, Chairman  
Alleghany County Commissioners

## TOWN OF SPARTA

### TOWN COUNCIL MEMBERS:

ALTON THOMPSON  
EARL CALHOUN  
GEORGE M. IRWIN  
H. EUGENE GRAY  
KEMP DUNCAN

SPARTA, N. C. 28675

CHARLES CASTEVENS, MAYOR  
WORTH B. FOLGER, TOWN ATTY.  
ARNOLD T. DELP, TOWN CLERK

Charles M. Mueller, Executive Director  
Regional Health Council of Eastern Appalachian  
210 South Main Street  
Marganton, North Carolina 28655

Re: Request for a Grant for Solid Waste Program for Alleghany County.

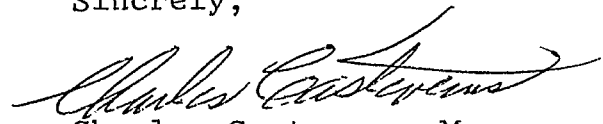

Mr. Mueller:

The Town of Sparta endorses the above request.

We will participate with Alleghany County in the operation of a sanitary landfill and share the cost of such operation. The cost will be shared on a 50-50 basis. The Town of Sparta will support the request for funds for the Alleghany County Solid Waste Program for the first year, on a 50-50 basis.

Your cooperation and assistance will be greatly appreciated.

Sincerely,

Charles Castevens, Mayor

Mr. Peter Hecht  
Regional Health Council of Eastern Appalachia  
201 South Green Street  
Morganton, North Carolina

Dear Mr. Hecht:

Re: Supplemental Request for the Continuation Grant  
for the Solid Waste Program, Region D

We have completed our review of this project, and we find it consistent with the plans of the region and not in conflict with other programs. We are pleased to recommend favorable consideration of your application by the Appalachian Regional Commission.

This letter may be used as the official Region D Clearinghouse comment to accompany your application.

Sincerely,

  
Ruth S. Glass

## PROJECT STAFFING

The professional staff for the Solid Waste Program will consist of a Director of the Solid Waste Commission. The director will possess the following qualifications:

- Considerable knowledge of solid waste management,
- Knowledge of personnel policies and practices,
- Knowledge of basic scientific principles of engineering and ability to apply to sanitary landfill operation.
- Knowledge of local, state and federal solid waste regulation and a general knowledge of water and air pollution.

Ability to plan, assign and review the work of others.

Ability to understand and carry out oral and written instructions.

Ability to present comments clearly and concisely in oral or written form.

Ability to keep records and prepare reports.

Ability to deal tactfully with public and to exercise good judgment in appraising situations and making decisions.

### Acceptable Training and Experience

Graduation from an approved four year college plus experience in environmental health or an equivalent combination of training and experience.

## LANDFILL COMPACTION EQUIPMENT OPERATOR

### Nature of Work

An employee in this class performs daily operation, supervision, and maintenance of the landfill site.

### Illustrative Examples of Work

The landfill compaction equipment operator is responsible to see that the sanitary landfill is neat and orderly at all time.

The landfill compaction operator is reasonable for spreading, compacting and applying cover material.

The landfill compaction equipment operator is responsible for applying sanitary landfill principles and methods of operation as prescribed by the Director, Regional Solid Waste Commission and in accordance with provisions contained in this plan.

The landfill compaction equipment operator is responsible for the maintenance of the equipment under his care as prescribed by good operating procedures and by the equipment maintenance guide and such additions as may be prescribed by the Director, Regional Solid Waste Commission or his designee.

The landfill compaction equipment operator is responsible for the orderly flow of traffic entering and leaving the landfill site.

The landfill compaction equipment operator is responsible to see the a minimum of 6 in. of compacted soil has sealed the compacted refuse before closing the sanitary landfill each day, regardless of weather conditions.

The landfill compaction operator is responsible to see that the equipment and the sanitary landfill site is properly secured at the close of business each day.

### Knowledge, Skills and Abilities

Ability to operate heavy duty dirt moving equipment.

Ability to understand and apply pertinent methods of landfill operation.

Ability to record a variety of landfill records.

Ability to carry out routine maintenance of equipment.

### Acceptable Training and Experience

Completion of high school or equivalent training or experience.

One year experience operating heavy dirt moving equipment.

## HEAVY DUTY TRUCK DRIVER

An employee in this class performs daily operation of collection routes.

### Illustrative Examples of Work

The heavy duty truck driver is responsible to see that the rural bulk containers are emptied and maintained on a regularly scheduled basis.

The heavy duty truck driver is responsible to see that the container site is neat and orderly after each service visit.

The heavy duty truck driver is responsible for maintenance of equipment under his care as prescribed by good operating procedures and by the equipment manufacture's guide and additions as may be prescribed by the project director or his designee.

### Knowledge, Skills and Abilities

Ability to operate a heavy duty truck.

Ability to record a variety of collection records.

Ability to carry out routine maintenance of equipment.

### Acceptable Training and Experience

Completion of high school or equivalent training and experience.

One year experience operating heavy duty truck.

Possess a current operators license for operating a heavy duty truck in the State of North Carolina.

14. **AGREEMENT:** The undersigned accept, as to any grant awarded, the obligation to apply those funds in accordance with applicable Federal laws, including Section 202, 302(e), and 402 of the Appalachian Regional Development Act of 1965, as amended, and to comply with grants policies established by the Health Services and Mental Health Administration of the Department of Health, Education, and Welfare and pertinent to this program in effect at the time of the award, and with any special conditions that may be a part of the award. The undersigned also certify that personnel associated with the project have no commitments or obligations, including those with respect to inventions, inconsistent with DHEW Regulations (42 C.F.R. Part 8). The undersigned further agree to comply with Title VI of the Civil Rights Act of 1964 (P.L. 88-352), and the Regulations pursuant thereto, and state that the formally filed or attached Assurance of Compliance with such Regulations (Form HEW 441) applies to this project.

Solid Waste & Vector Control Branch  
Division of Health Services  
N.C. Department of Human Resources  
Raleigh, N.C.

## SECTION I - Introduction

In the overall environmental sanitation picture of rapidly expanding urban communities of North Carolina, the problem of how to handle the estimated 4,511,000 tons of refuse produced annually offers one of our greatest challenges. This is a problem of the community as well as the individual and continual disregard on the part of either will certainly result in unnecessary disease and annoyance. Lack of understanding, carelessness and indifference is largely responsible for our present problems. Frequently, individual effort is fruitless without public control, but, at the same time, efforts of public health agencies are doomed to failure without support of individual citizens.

Refuse which is contaminated with disease organisms originating in the home or institutions provides food and shelter for many of our most important public health pests, insects and rodents. It is, therefore, necessary that refuse be handled in an acceptable manner from the point of origin to that of disposal. Refuse, at the point of origin, is largely the responsibility of the producer and must be stored in an approved manner. Refuse collection is accomplished in three ways: (1) by the individual, (2) by a governmental agency using public funds, and (3) by private contract garbage collectors who are paid by the individual receiving the service. Refuse disposal is normally accomplished by (1) the individual who utilizes his own land or disposal areas belonging to private or public agencies, (2) by governmental agencies who utilize publicly-owned disposal areas or (3) by private collectors who provide their own disposal areas or utilize that of a public agency. No longer is the old-fashioned, insanitary refuse dump acceptable in today's society as a means of refuse disposal. An open dump is aesthetically offensive because of smoke and odors and is responsible for the reduction of adjacent land values, and are gradually being replaced by the sanitary landfill or other sanitary means of refuse disposal.

## SECTION II - Legal Aspects

### Authority to Regulate

#### State Board of Health

"Rules and Regulations Providing Standards for Solid Waste Disposal" adopted by the North Carolina State Board of Health as directed by Article 13B of Chapter 130 of the General Statutes shall be used as minimum standards for solid waste management.

#### Local Board of Health

County or district boards of health may adopt more stringent regulations as provided by General Statute 130-17.

#### Boards of Commissioners

County boards of commissioners have authority to regulate under G.S. 153-272 through 275, the collection and disposal of refuse by private persons and firms outside municipal boundaries.

In exercising this authority, the board of commissioners may:

- (1) Issue licenses or permits for the collection and disposal of refuse.
- (2) Prohibit collection and disposal by unlicensed persons.
- (3) Grant licensed persons exclusive rights to collect in designated areas.
- (4) Regulate the fees charged for private collection services.
- (5) Operate collection and disposal services.

### Authority to Finance

The 1967 General Assembly amended G.S. 153-77 and G.S. 153-80 of the County Finance Act to authorize the issuance of bonds for sanitary landfills and for vehicles and equipment.

SECTION III  
The Present Solid Waste Management Program  
in  
Alleghany County

Alleghany County: Population: Urban	1304
Rural	6830
Total Population	8134
Area in Square Miles	230

Storage: The N.C. Division of Health Services Rules and Regulations governing on-site storage of solid waste are applicable to Alleghany County but are not being enforced throughout the county. Solid waste is stored on the ground or in unapproved containers, many of which have no lids. This provides ideal conditions for the breeding and feeding of flies, rats and other pests.

Collection: The Town of Sparta provides house-to-house collection services once per week. There is no collection service provided for the rural population.

Disposal: A solid waste disposal site and operational plans have been approved by the N.C. Division of Health Services for Alleghany County. The site is not operated as required by the N.C. Division of Health Services Rules and Regulations due to lack of adequate equipment.

There are many roadside dumps in the county due to the absence of any type of collection system.

#### SECTION IV - Recommendations

To provide a solid waste management program in Alleghany County that will protect the health of the people, improve the county's environment, meet the requirements of the Division of Health Services "Rules and Regulations Providing Standards for Solid Waste Disposal" and be economically feasible, it is recommended that:

Storage: Section IV, Solid Waste Storage, Division of Health Services Rules and Regulations be enforced throughout the county.

Collection: Solid waste collection within the municipality be the responsibility of the municipality.

Collection may be by municipality owned and operated equipment or by contract with private collectors.

House-to-house collection in the rural area by private collectors for a fee where desired.

A roll-off container system consisting of forty cu. yd. containers and a container truck be provided for rural collections. Due to the topography, small area of the county, roads leading to central areas in the county, population clusters, lack of suitable sites for small containers and the much less down time on the roll-off truck compared to the truck used for small containers, it is felt that the roll-off system is much more desirable for Alleghany County than the small container system.

All vehicles or containers used for the collection and transportation of solid waste shall meet the requirements of Section V of the Division of Health Services "Rules and Regulations Providing Standards for Solid Waste Disposal."

Disposal: The sanitary landfill site that has been approved by the Division

of Health Services be operated as planned and in accordance with Section XI of the Division of Health Services "Rules and Regulations Providing Standards for Solid Waste Disposal."

A recommended set of rules and regulations for this landfill is enclosed.

## SECTION V - Cost Analysis

The following cost estimates are based on the operation of the landfill site that has been approved and the container system as recommended in Section IV.

### Capital Investment (Landfill)

#### Site:

One (1) site	No cost
--------------	---------

#### Equipment:

One (1) high-lift loader with multi-purpose bucket, cab and heater (Allis Chalmers HD7G, Caterpillar 955, International 175 or equal)	\$35,000
One (1) chipper	3,500
Miscellaneous equipment and supplies	5,000

#### Structure:

One (1) structure to provide housing for equipment and an office for personnel	<u>10,000</u>
TOTAL	\$53,500

### Capital Investment (Container System)

One (1) all-hydraulic lifting unit mounted on a standard cab-over truck chassis	\$ 27,000
Seven containers (40-cu. yds.) @ \$3,000/container	21,000
Site preparation for containers (Six (6) sites @ \$2000/site)	<u>12,000</u>
TOTAL	<u>\$ 60,000</u>
TOTAL CAPITAL INVESTMENT	\$113,500

Estimated Annual Operating Cost (Disposal)

*One (1) equipment operator	\$ 8,000
One (1) gateman	3,600
Fuel & Repair (est. 600 hrs. per year)	3,000
Miscellaneous (S.S., Ins., etc.)	<u>3,000</u>
TOTAL	\$17,600

Estimated Annual Operating Cost (Container System)

Fuel & Repair (8000 miles @ 50¢/mile)	\$ 4,000
Miscellaneous (Site upkeep, light, container repairs and etc.)	<u>2,400</u>
TOTAL	\$ 6,400

Total Estimated Annual Operating Cost  
(Not including equipment depreciation)

Disposal	\$17,600
Container system	<u>6,400</u>
TOTAL	\$24,000

NOTES:

- 1.\* The landfill operator would drive the container truck each morning. The volume of waste received at the landfill would not require an operator at the site in the A.M. provided the gateman was at the site to see that the waste was properly placed.
2. The containers would be serviced twice per week and with the limited driving distance, they could be serviced in the A.M. five days each week.

3. An agreement should be worked out with the Town of Sparta or with the county to have a trained man for relief operator (Sick leave and vacation for landfill operator).
4. Each container site would require about one-half acre of land. This land could be leased or provided by the community in which the container was placed. Enclosed in the appendix is a plan for construction of a container site.

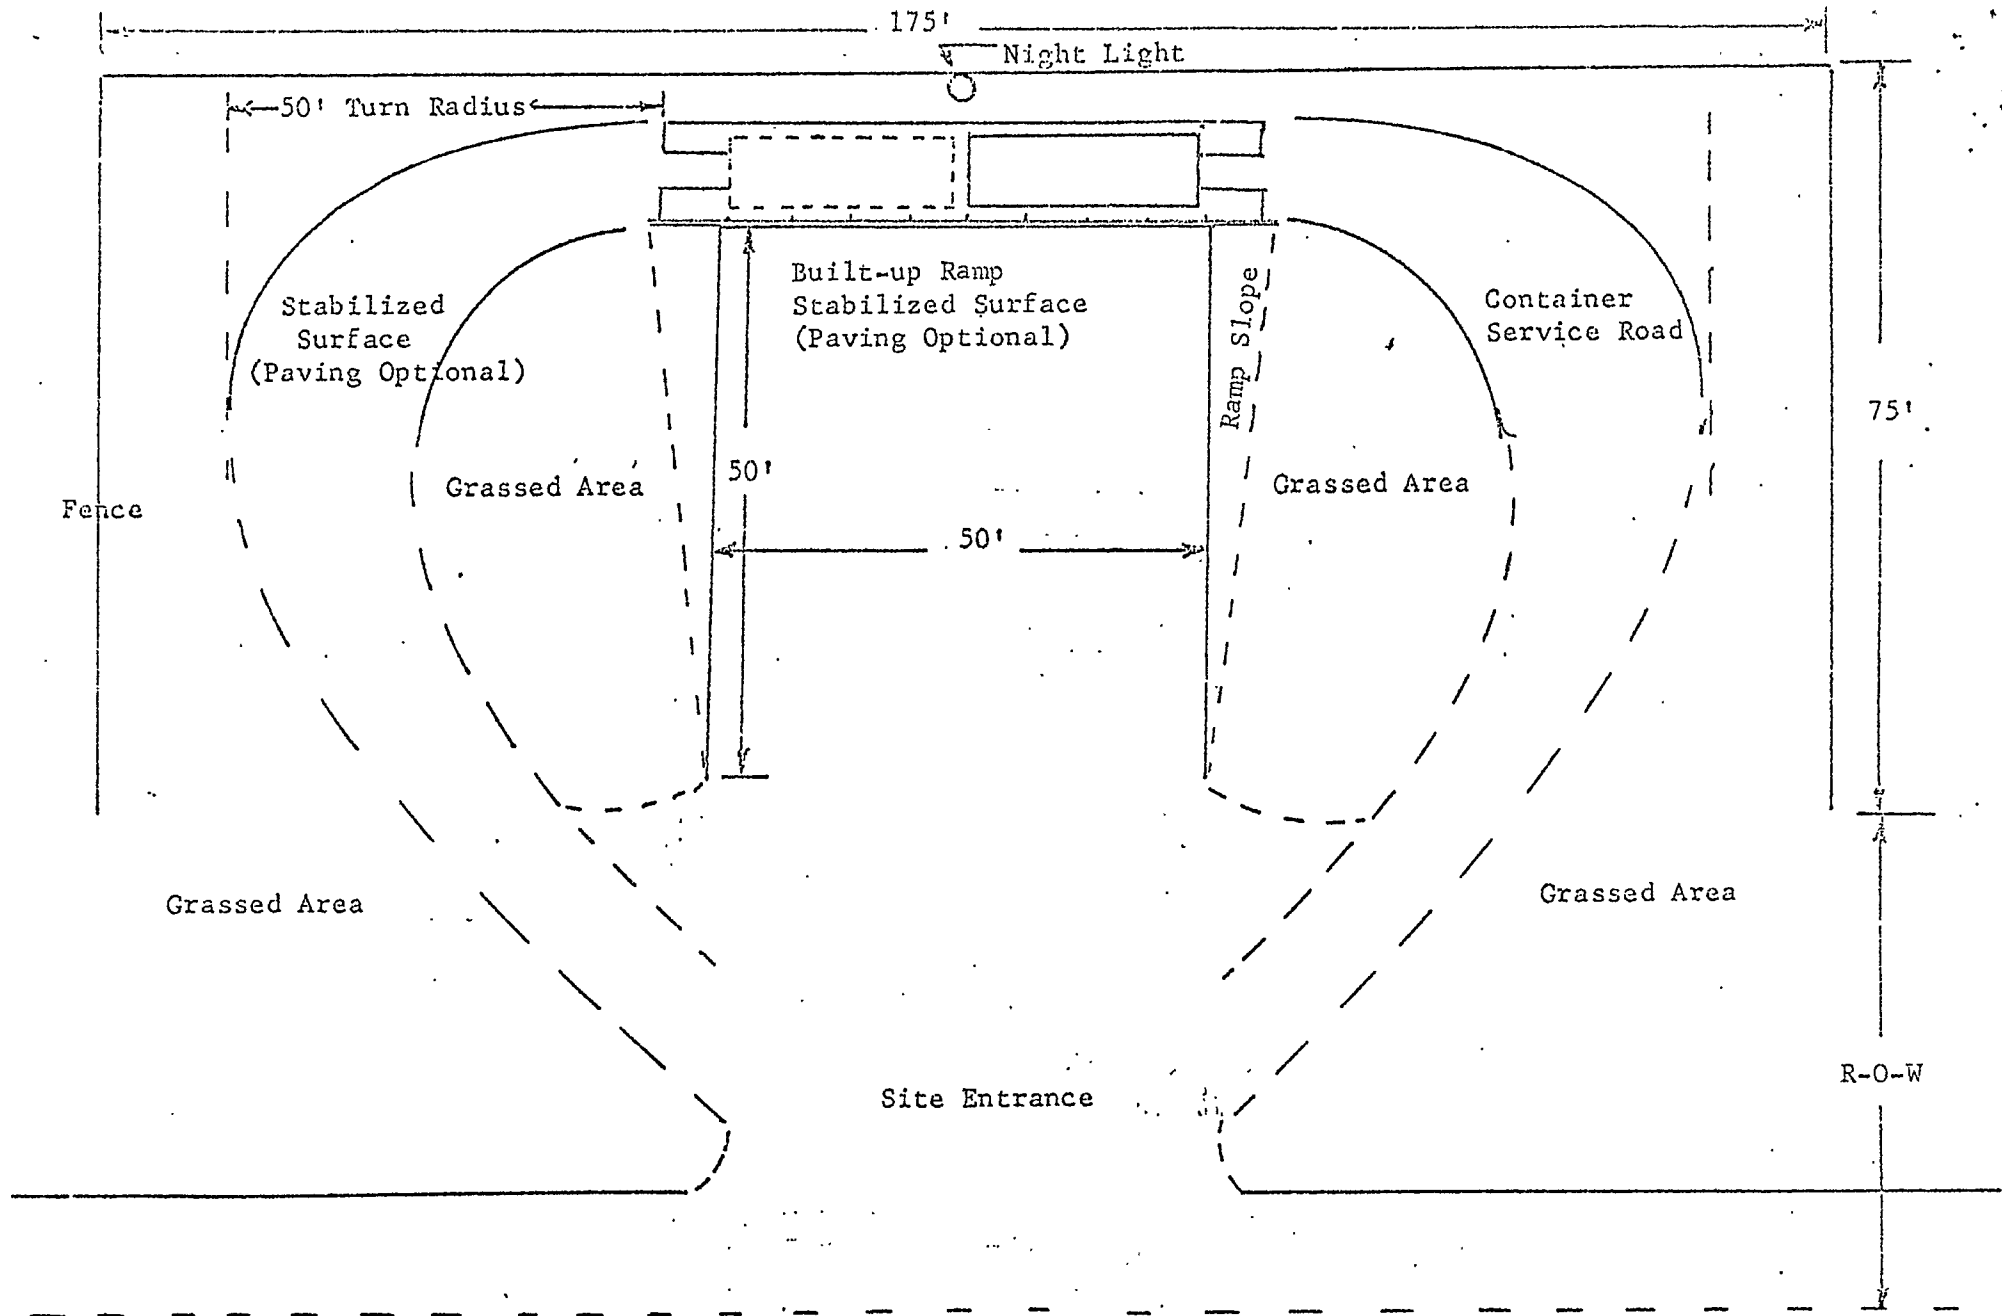

## SECTION VI - Conclusion

1. While it is desirable to have at least 20,000 persons served by each sanitary landfill, it is not feasible to haul the solid waste generated in Alleghany County to a regional site due to distances, type of terrain and road conditions during the winter months.
2. The recommended program, properly supervised, will adequately serve the solid waste management needs for the foreseeable future in Alleghany County.
3. This program, while somewhat high in cost per capita due to the small population served, is economically feasible and is not above a reasonable amount to be spent on solid waste management in this county.

## APPENDIX A

### RULES & REGULATIONS for ALLEGHANY COUNTY

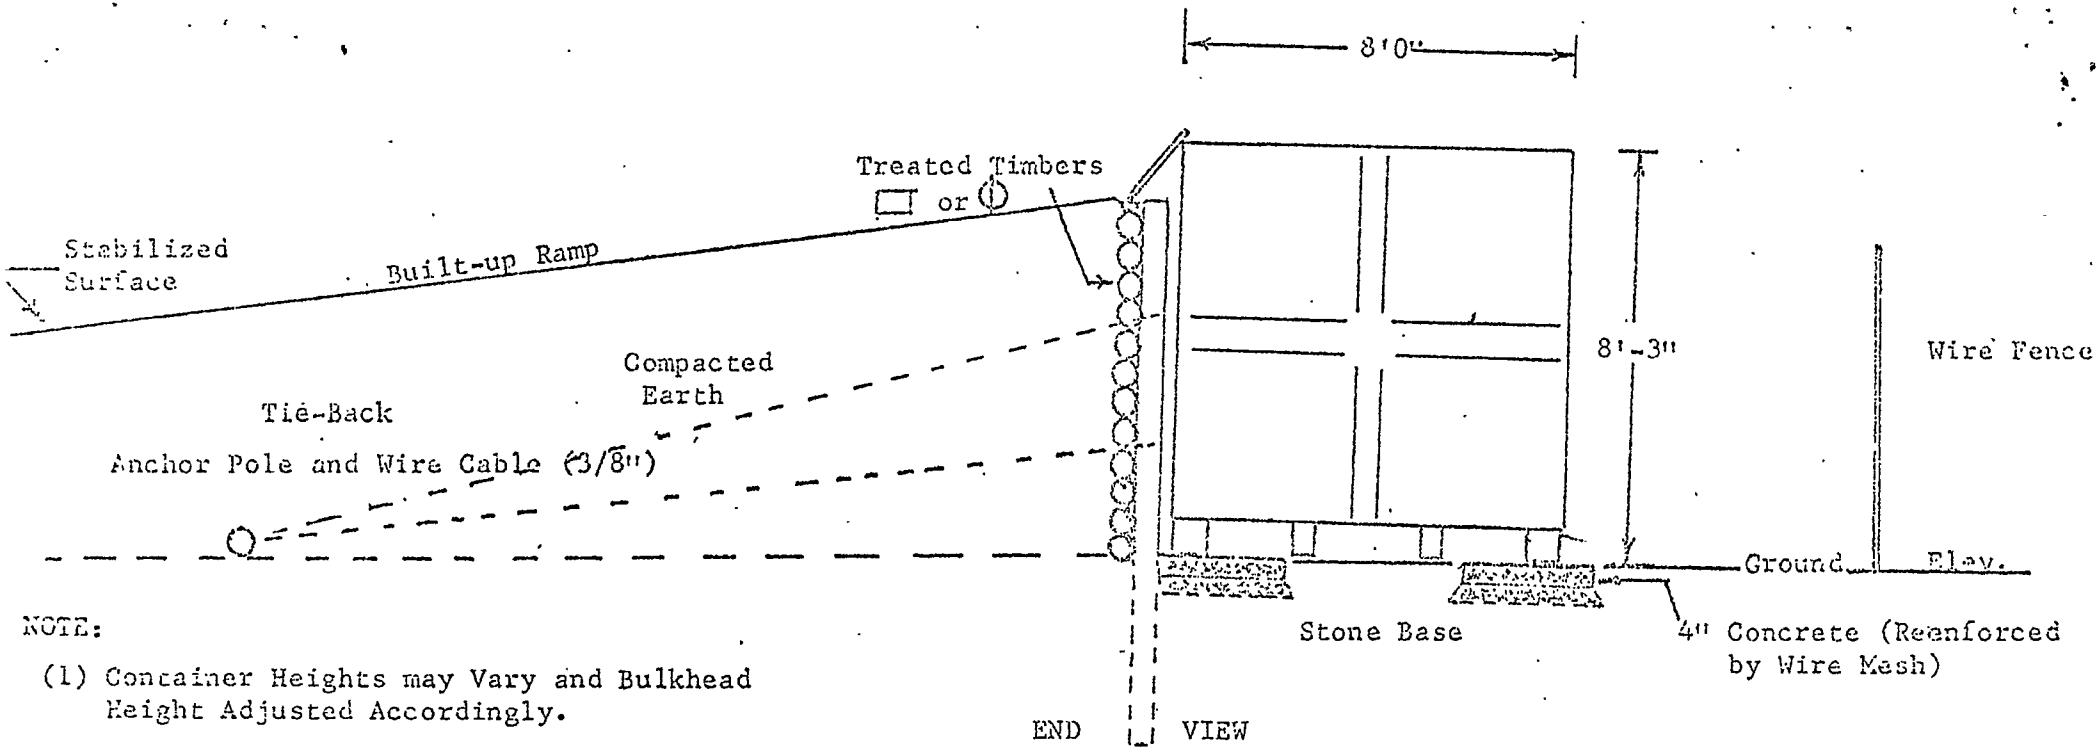

1. At no time will this site be open to the Public without a County Employee on the site.
2. Hours of operation will be posted at the entrance and made known to the public at large by all news media available.
3. The exact hours will vary with summer and winter seasons and regular and daylight savings time. The intent is to keep this site open to provide service to the public when they can make the best use of this site. Saturdays and holidays it shall be open to aid in this problem.
4. Under no circumstances will there be any burning on this site.
5. The speed limit shall never exceed 15 miles per hour unless posted otherwise.
6. Any vehicle arriving on this site without being properly covered will be issued a citation for this and a thorough understanding reached by both parties to insure this regulation is followed to the letter.
7. Absolutely no salvaging will be allowed on this site.
8. Containers will be placed at the entrance so that during closed hours these can be utilized for small amounts of waste.
9. Persons or firms not complying with these rules will be prosecuted and if necessary barred from use of this facility.
10. It shall be the responsibility of the hauler to indicate if they are hauling matter which requires special handling, such as spoiled foods, animal carcasses, or waste which requires immediate covering, and it shall be the duty of the site operator to either have this accomplished or do so himself.
11. Rubber tires shall be shredded or cut in quarters prior to delivery to the site.
12. No solid waste with any dimension greater than six feet shall be accepted at the site.

**ALLEGHANY COUNTY**  
 NORTH CAROLINA

December 10, 1973

Mr. Leo Tompkins  
Chairman, Allegheny County  
Board of Commissioners  
Erie, North Carolina 28623

Dear Mr. Tompkins:

This office has prepared for Allegheny County a Solid Waste Management Plan including estimated cost analysis. Also included are three alternate plans with cost analysis so that you and your Board can have some cost estimates upon which to base your decision.

*JRH*

Allegheny County is in great need of a solid waste management program to protect the health of the people and the environment and to meet the requirements of the Division of Health Services Rules and Regulations by July 1, 1974, as required.

This office requests that every effort be made to implement a solid waste program at the earliest date possible and if this office can be of assistance, I shall appreciate hearing from you.

Very truly yours,

Donny H. Hary, Esq.  
Solid Waste & Vector Control Branch  
Sanitary Engineering Section

RALEIGH

November 14, 1973

Mr. Leo Tompkins  
Chairman, Alleghany County  
Board of Commissioners  
Famice, North Carolina 28623

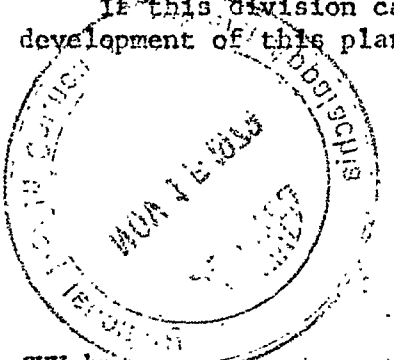

Dear Mr. Tompkins:

I am sure that the decision to provide Alleghany County with a solid waste management program will be a great asset to the needs of that county. I can assure you that where such a program has been started in other counties it has been received with great interest and the rural areas have been most appreciative of the effects the program has had on solid waste disposal.

The plan that you requested is in the process of being prepared and this division should be able to give you a cost estimate on Thursday, November 15, 1973. The plan will be presented to the entire Board of Commissioners at their pleasure. I think it will be necessary to take prompt action in the implementation of this program in order to meet the requirements of the State regulations by July 1, 1974. The equipment demands have caused rather lengthy delays in delivery after the awarding of contracts.

If this division can provide you with additional assistance in the development of this plan, I shall appreciate hearing from you.

Very truly yours,

*Sidney H. Usry*

- VI. A. If any State agency(s) Regional Planning Agency(s), or Local Government unit(s) have been contacted or have furnished information relative to the proposed project, list individual staff members contacted and agencies they represent.

Alleghany County Commissioners, Blue Ridge Planning and Development Commission

- B. List any other State or Local agencies which might have an interest in or be affected by the proposed project.

State Board of Health, Alleghany Health Department

VII. DESCRIPTION OF THE PROPOSED PROJECT:

- A. Title Alleghany County Solid Waste Program
- B. Narrative Description of the Proposed Project; Including Quantitative Information as to Size, Number of Units, etc.:

The Alleghany County Solid Waste Program is designed to provide for a comprehensive collection and disposal system for the citizens of Alleghany County. The collection system will provide for mail box to mail box pickup of household wastes. The Town of Sparta and Alleghany County have a sanitary landfill which is a joint operation. The cost for operating the landfill will be shared equally.

The Board of County Commissioners will work with the North Carolina State Board of Health to assure a comprehensive program that will meet all State and Federal requirements.

- VIII. Does the Federal Agency Administering the Program Under Which Funding will be Requested Require an Environmental Impact Statement? No. (If Yes, attach a statement of the nature and extent of environmental impact anticipated.)

Attach additional sheets if necessary to present complete information, and mail completed form to:

March 29, 1972

Mr. Andrew Yasinac, Director  
Area "D", Solid Waste Program  
Sparta, North Carolina 28675

Dear Mr. Yasinac:

At a meeting of the Solid Waste Committee of the Kline Ridge Health Council attended by Mr. James Fulp of N. C. State Board of Health on Tuesday, March 21, 1972, the following items regarding the Solid Waste Program in Area "D" were adopted:

1. All landfills will be operated as area landfills using the Kline method. (This is a recommendation of Mr. Fulp, Sanitary Engineering Division, N. C. State Board of Health.)
2. At all times, Mr. Fulp or the Sanitary Engineering Division recommendations will be followed.
3. The Solid Waste Director is to devote all time necessary to get plans for each Sanitary Landfill Site to the State Board of Health at the earliest possible moment. (It is felt that the Sanitarian in each of the respective counties can look after the landfill operations until such time as the plans are completed and submitted to the Sanitary Engineering Division.)
4. It is imperative that the Solid Waste Director send an itinerary to each respective Health Department weekly and shall follow itinerary unless notification is given to county Sanitarian. All appointments shall be kept on time unless advance notification is given.
5. Solid Waste Director shall keep a daily log of all activities and give a monthly report of such activities to the monthly meeting of the Solid Waste Committee of the Kline Ridge Health Council on the first Friday of each month at 10:30 AM at the Garrett Memorial Hospital in Crossnore, North Carolina.

6. No purchases or expenditures are to be made, or contracted for, without prior approval of the Solid Waste Committee.

Sincerely,

*Jack D. Cobb*

Jack D. Cobb, Chairman  
Solid Waste Committee

Mr. Andrew Yasinsac  
314 Maple Street  
Sparta, North Carolina 28675

Dear Mr. Yasinsac:

Please find enclosed a sample set of plans indicating the minimum amount of information required as per Section IX of the North Carolina State Board of Health "Rules and Regulations Providing Standards for Solid Waste Disposal" for each site being considered.

The first requirement of Section IX.A.1 (omitted in this sample set) can be satisfied by including copies of U.S.G.S. maps, or aerial photos, or land use plans for each site. General procedure is to present items A.1, A.2, A.3, and A.4 of Section IX for site approval and to follow with the items required of B.1 and B.2 (a.-h.) of the same Section for operational plan approval.

When submitted, three copies of each item are required.

Yours truly,

Jerry C. Perkins, Sanitary Engineer  
Solid Waste & Vector Control Section  
Sanitary Engineering Division

Mr. Andrew Yasinsac  
Project Director of Solid Waste  
Blue Ridge Health Council  
Sparta, North Carolina 28675

Dear Mr. Yasinsac:

I am writing to you regarding the landfill inspections for the six counties of your Blue Ridge Solid Waste Program.

It can be seen from the enclosed copy of the North Carolina State Board of Health Rules and Regulations Providing Standards for Solid Waste Disposal that preliminary inspections are required for all proposed sanitary landfill sites. Following the preliminary inspection, it will be necessary that you submit to the North Carolina State Board of Health detailed plans as specified in Section IX of these regulations.

If I can provide you with assistance in the development of these plans, I shall appreciate hearing from you.

Very truly yours,

J. N. Fulp, Sr., District Sanitarian  
N. C. State Board of Health

Dear Mr. Hampton:

Re: Clearinghouse Notification No. 71-0942  
S. F. Application for Solid Waste  
Disposal System, Alleghany County,  
Sparta, North Carolina, Farmers Home  
Administration, USDA

After receiving an S. F. 101 application for a solid waste disposal plan for Alleghany County, a proposal for a solid waste disposal plan for Region "D" was also received. This regional plan includes Alleghany County and seeks funds from the Appalachian Regional Commission.

The State Board of Health has approved a solid waste disposal plan for Alleghany County. The cost estimates on the S. F. 101 agree with the estimates by the State Board of Health. However, the State Board of Health favors the regional approach to the individual county plan if the regional plan proves feasible. The Board, of course, is assisting in the development of a regional plan.

The State Clearinghouse wishes to reserve final comment until the regional plan is developed. This office most likely will recommend the regional plan if it proves feasible.

Sincerely yours,

*Benjamin D. Seymour*

Mr. Randolph Hendricks  
Planning Coordinator  
State Planning Division  
Department of Administration  
Raleigh, North Carolina

Re: CH 71-0542  
Solid Waste Disposal System  
Allegheny County

Dear Mr. Hendricks:

This application describes a proposal for the establishment of a county-wide solid waste disposal system in Allegheny County.

Our staff assisted Allegheny County in the preparation of a solid waste management plan and the estimated total project cost shown in the application agrees with that shown in the plan. Ordinarily we would recommend approval; however, we received from your office another application, CH 71-0549, which proposes to establish a 7 county regional solid waste disposal system, and Allegheny County is included. Our staff has been requested to assist in the development of a regional plan and is now providing assistance.

If a regional plan should prove feasible, we would favor such an approach. Therefore, we recommend this application be approved provisionally pending action on CH 71-0549.

Very truly yours,

Marshall Stanton, Director  
Sanitary Engineering Division
